

KIVARI AX

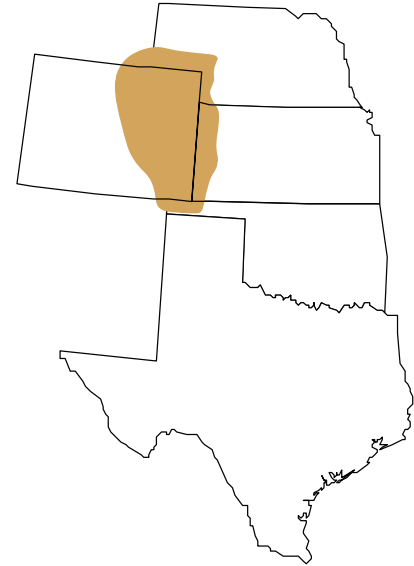

CHARACTERISTICS HARD RED WINTER

MATURITY	Medium Early
HEIGHT	Medium
YIELD	Very Good
DROUGHT TOLERANCE	Very Good
MILLING QUALITY	Good
BAKING QUALITY	Very Good
STRAW STRENGTH	Fair
TEST WEIGHT	Good
PROTEIN	Fair
COLEOPTILE LENGTH	Medium
PEDIGREE	(AF28/Byrd)//(AF10/2*Byrd)

AREA OF ADAPTATION

Variety Protection Status

PVP Unauthorized Propagation Prohibited - to Be Sold by Variety name Only As a Class of Certified Seed - U.S. Protected Variety - 1994 PVPA

FEATURES & BENEFITS

Released in 2020, Kivari AX is the newest CoAXium Variety in the PlainsGold lineup with slightly later maturity compared to Crescent AX, and improved spring frost tolerance.

Kivari AX offers improved yield performance with excellent drought tolerance proven by its Byrd parent. Kivari AX has good test weight, wheat curl mite resistance, but weaker straw in high moisture environments. It's recommended to be planted on dryland acres of the central high plains only. Certified Seed Only, no saved seed allowed. Stewardship Agreement required.

CERTIFIED SEED ONLY

By purchasing seed, grower agrees to use seed of the variety only for the production of a commercial grain or forage crop. Resale of this seed, or supply of saved seed derived from this seed, to anyone including purchaser for planting is prohibited.

STEWARDSHIP AGREEMENT REQUIRED

In addition to purchasing Certified Seed every year, farmers are required to sign, and adhere to, the CoAXium® Wheat Production System Grower Stewardship Agreement outlining best management practices on product rates, crop rotation, mechanical and cultural practices and CoAXium® and Aggressor® use guidelines in different cropping systems.
