

# IT'S WHAT HAPPENS WHEN A BUNCH OF FARMERS PUT THEIR HEADS TOGETHER.

There's no denying CoAXium® Wheat Production System is the brainchild of farmers looking for a solution for grassy weeds. But the true success of CoAXium® came when farmers stayed involved to help develop, launch and test this cutting edge wheat production system. CoAXium® combines a non-GMO herbicide tolerance trait with Aggressor® herbicides to bring superior control of feral rye and downy brome including Group 2 (ALS) resistant grassy weeds. This season, we think you should plant CoAXium®. Because great minds think alike.
