

DROP DEAD PERFORMANCE

CLEANER FIELDS. HIGHER YIELDS.®

Downy Brome Can Be a Real Wheat Killer.

That's why more and more wheat farmers are counting on CoAXium® Wheat Production System driven by Aggressor® herbicide to protect their wheat. Debilitating grassy weeds like downy brome and feral rye literally suck the life out of a healthy wheat crop. They compete for light, moisture and space. CoAXium clears fields of grassy weeds and the end result is higher yields and increased gross revenue/acre. We're pretty sure that's a farmer's definition of performance.

Go to CoAXium.com/performance today to see more photos of CoAXium fields near you.
